What does DESI High mean to you?

Responses

It seems like a really exciting way to get involved with cs and space, I'm very interested to learn more

Its an opportunity to get into astrophysics while I'm still in high school, which I'm planning to go into in college

This project is an amazing opportunity that I definitely want to take advantage of. Cosmology is a topic that fascinates me, so being able to work with data from this instrument is so, so cool.

I'm interested in astronomy and coding, but I'm new to all the ideas in DESI High. I just want to try it out.

An cool and very rare opportunity for high school students to take part in modern scientific research!

kind of a difficult question, i would probably be more interested in DESI High the more i'm exposed to it so come back to me later

Very intimidating to get started. Interesting, but complicated.

Interesting, Intriguing, and excited to learn more about it

I think it's new and interesting, I definitely look forward to learning more about it.

i think its cool

Innovative. Inquiry. Challenging. Exciting. Applicable

intriguing

Fun!
